

fédération de données et de ConnaissancEs
Distribuées en Imagerie BiomédicaLE

*Distributed Biomedical Imaging Data and
Knowledge federation*

Johan Montagnat

What is CrEDIBLE?

- National project funded by CNRS (French National Research Center)
 - Part of CNRS inter-disciplinary mission
 - “MASTODONS” call ([Challenge in Big Scientific Data](#))
 - Five partners involved in France (CNRS, INSERM, INRIA, U. Picardie, U. Lyon)
- Started in 2012, extended on a yearly basis
- Targets **biomedical image resources federation**
 - Data fusion, mediation, semantic alignment, querying, link with processing

What is CrEDIBLE?

- Scientific networking initiative
 - Budget for networking and dissemination
 - Opening new contact opportunities
- Follow-up on various prior initiatives from project partners
 - Medical data sharing
 - Distributed computing
 - Large-scale data analysis

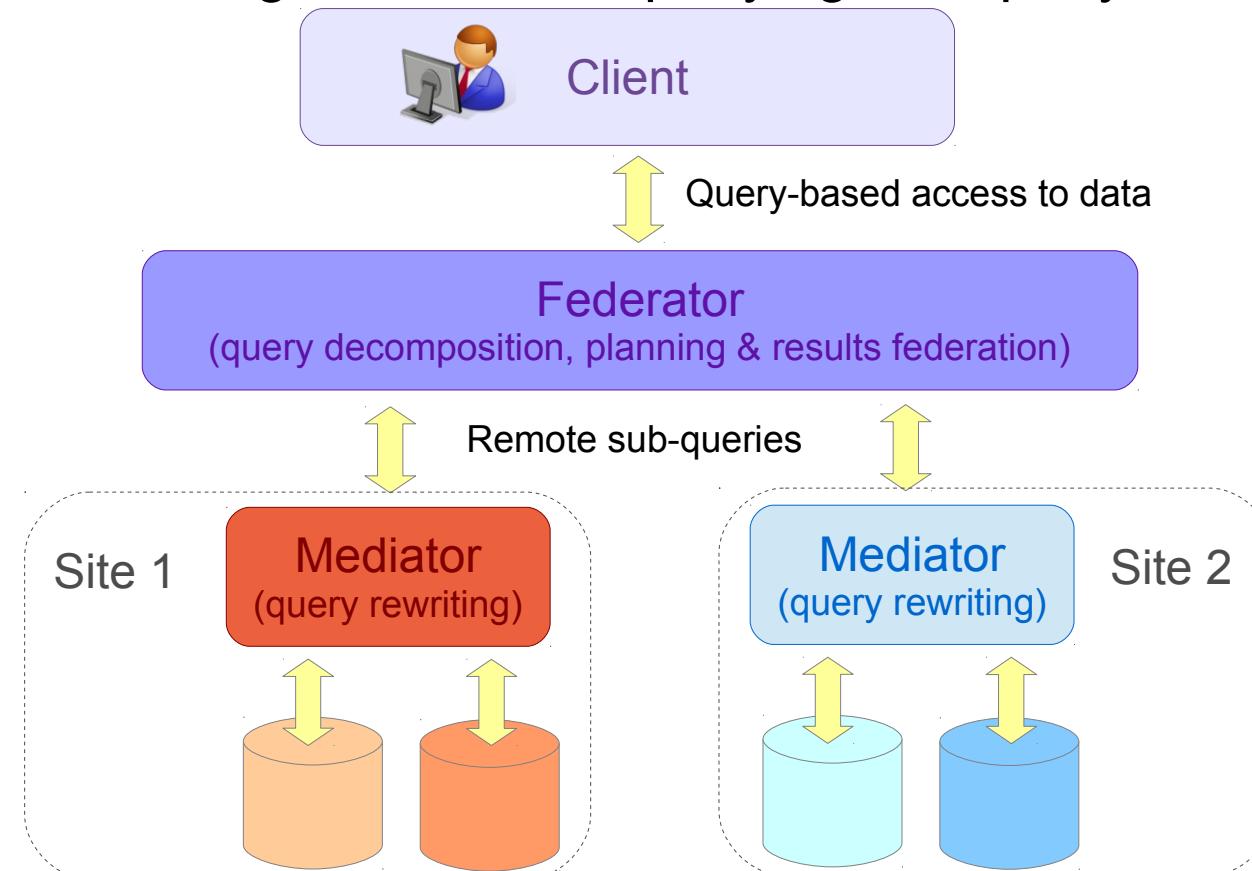

What is this workshop?

(https://credible.i3s.unice.fr/doku.php?id=2014_workshop)

- A multi-communities “think tank” opportunity
 - Intent to raise community discussions
 - 30 min. allocated per talk + panel for each session
 - Multi-disciplinary
 - Place for discussions
- How was it organized?
 - By invitation
 - Considering scientific themes of interest
 - Considering scientific challenges identified
- This year is the second edition
 - 2012 and 2013 reports:
<https://credible.i3s.unice.fr/doku.php?id=rapports>

Biomedical data mediation & federation

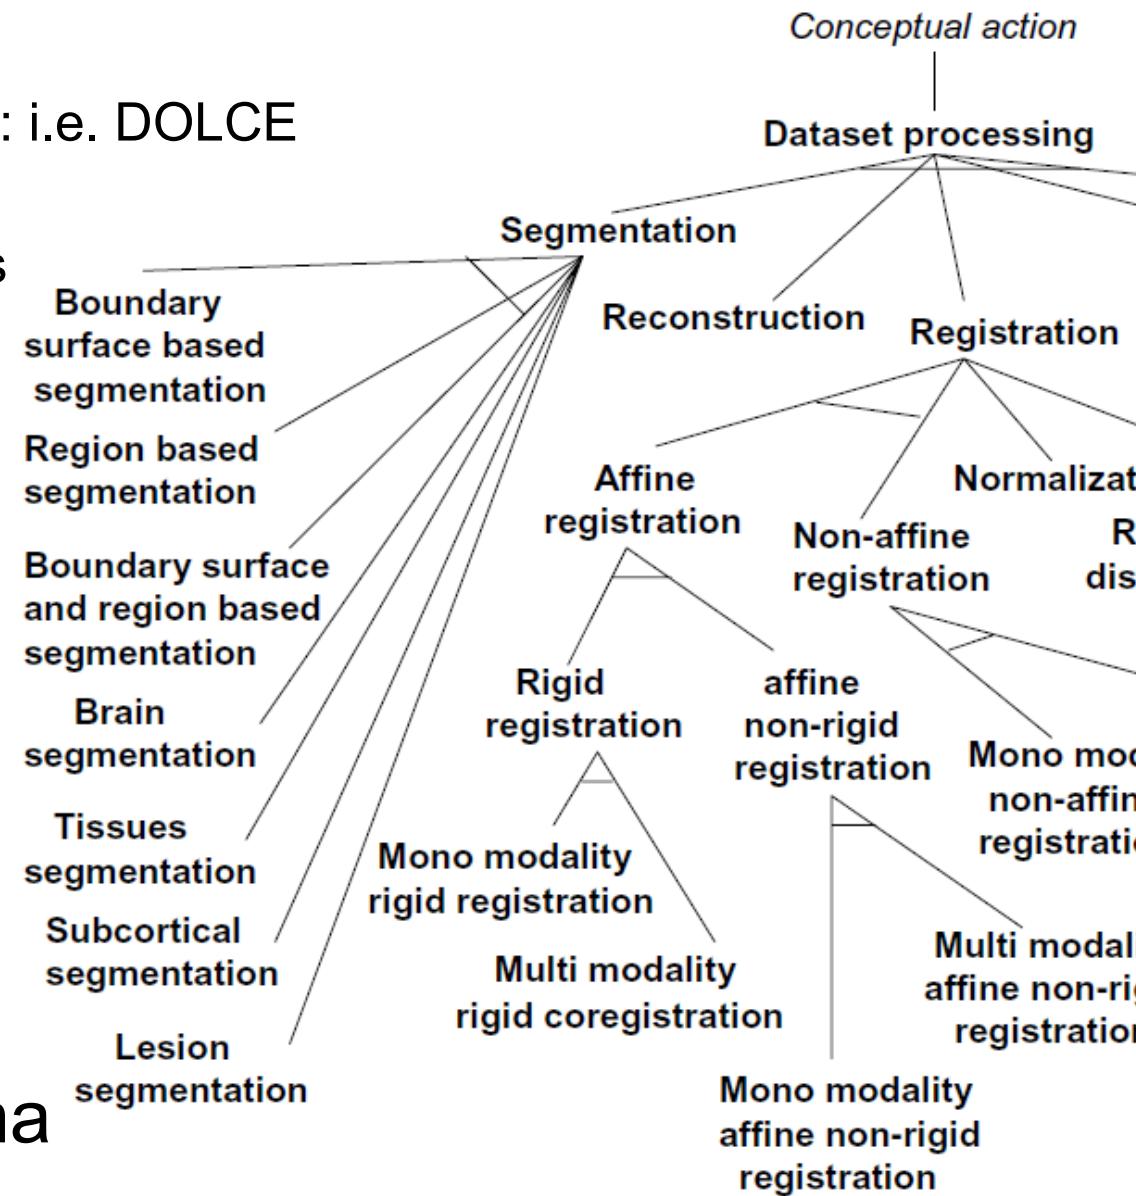

- Heterogeneous databases schema mediation
- Data federation through distributed querying and query rewriting

- Scientific experiment support platform:
 - raw data + models + processing results + models + provenance...

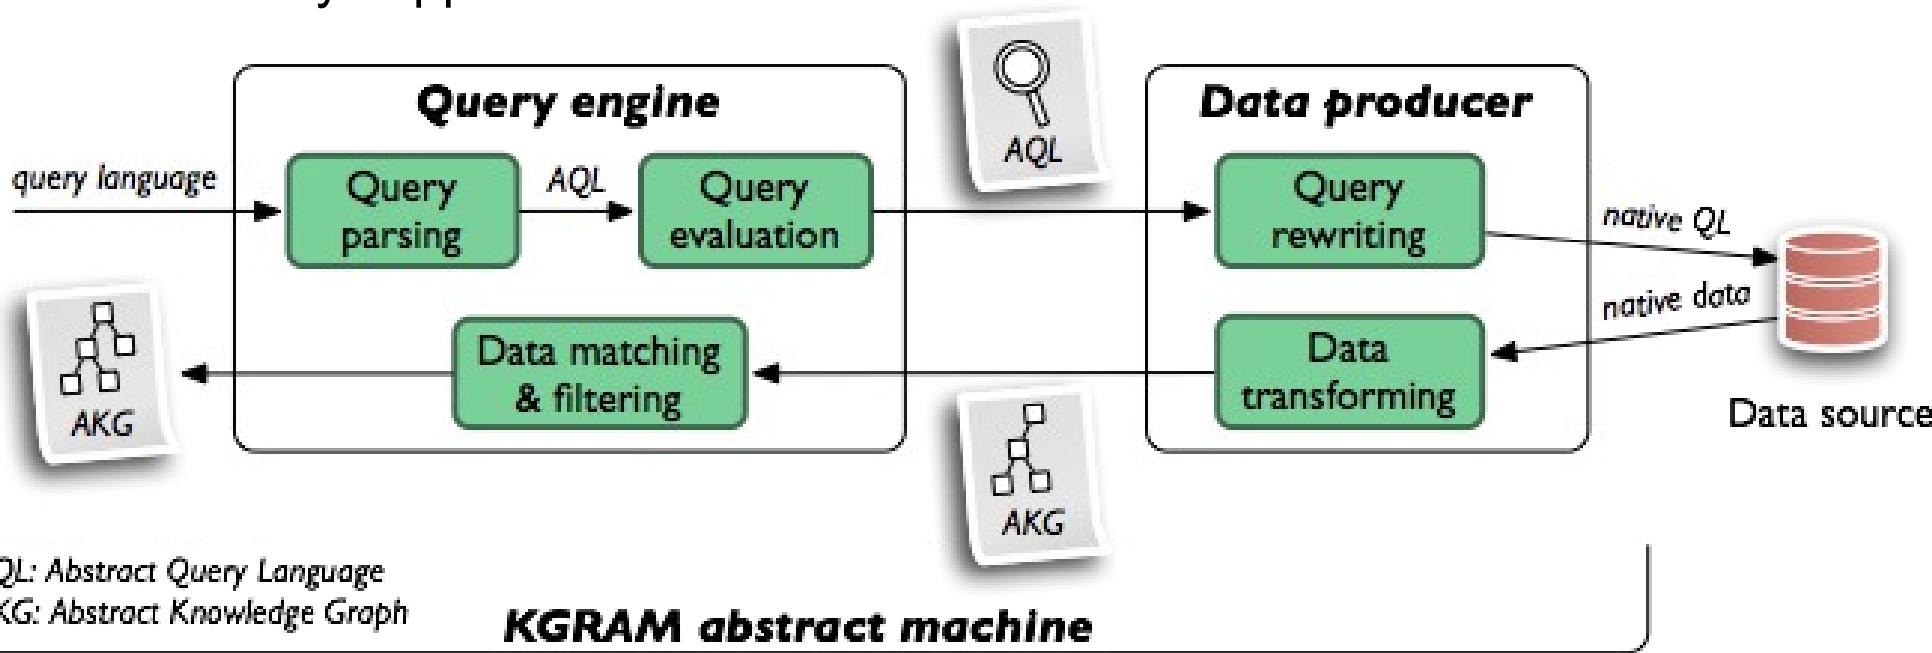

Semantic reference

- Application ontology
 - 3-levels structure
 - one Foundational ontology: i.e. DOLCE
 - Several Core ontologies
 - Several Domain ontologies
- Covering
 - Data sets
 - Data processing tools
 - Scientific measure
 - Medical context
 - Data provenance
 - ...
- Domain-specific rules
 - Inference abilities
- Derived relational schema

From relational to semantic medical stores

- Databases federation
 - Requires relational model mediation
 - Based on a semantic reference to derive the federated schema
- Based on KGRAM (Knowledge Graph Abstract Machine)
 - Semantic query engine enabling:
 - Heterogeneous data models
 - Fully supports SPARQL v1.1

Distributed Query Processing

- KGRAM query processing

```
Q SELECT ?name ?date  
WHERE { ?x foaf:name ?name . ?x dbpedia:birthDate ?date .  
        FILTER (CONTAINS (?name, 'Bob')) }
```

- Asynchronous execution

Distributed Query Processing

- KGRAM query processing

```
Q SELECT ?name ?date
WHERE { ?x foaf:name ?name . ?x dbpedia:birthDate ?date .
        Q1 FILTER (CONTAINS (?name, 'Bob')) }
        Q2
```

- Asynchronous execution

Distributed Query Processing

- KGRAM query processing

```
Q SELECT ?name ?date
WHERE { ?x foaf:name ?name . ?x dbpedia:birthDate ?date .
        Q1 FILTER (CONTAINS (?name, 'Bob')) } Q2
```

- Asynchronous execution

Distributed Query Processing

- KGRAM query processing

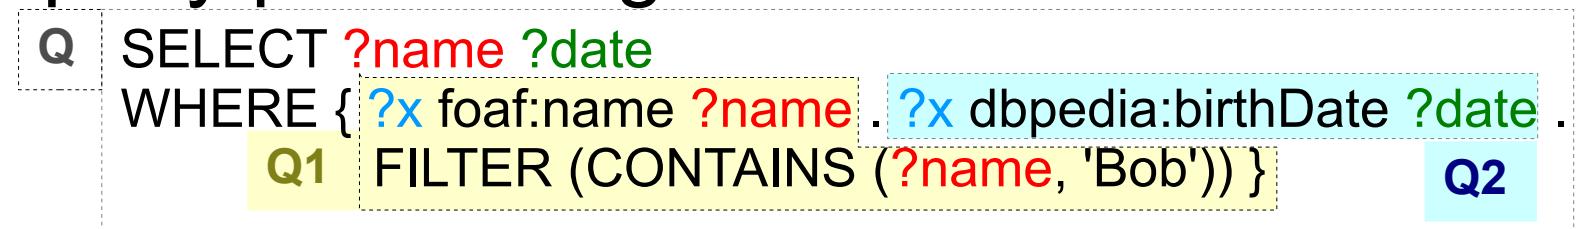

```
Q SELECT ?name ?date
WHERE { ?x foaf:name ?name . ?x dbpedia:birthDate ?date .
        Q1 FILTER (CONTAINS (?name, 'Bob')) } Q2
```

- Asynchronous execution

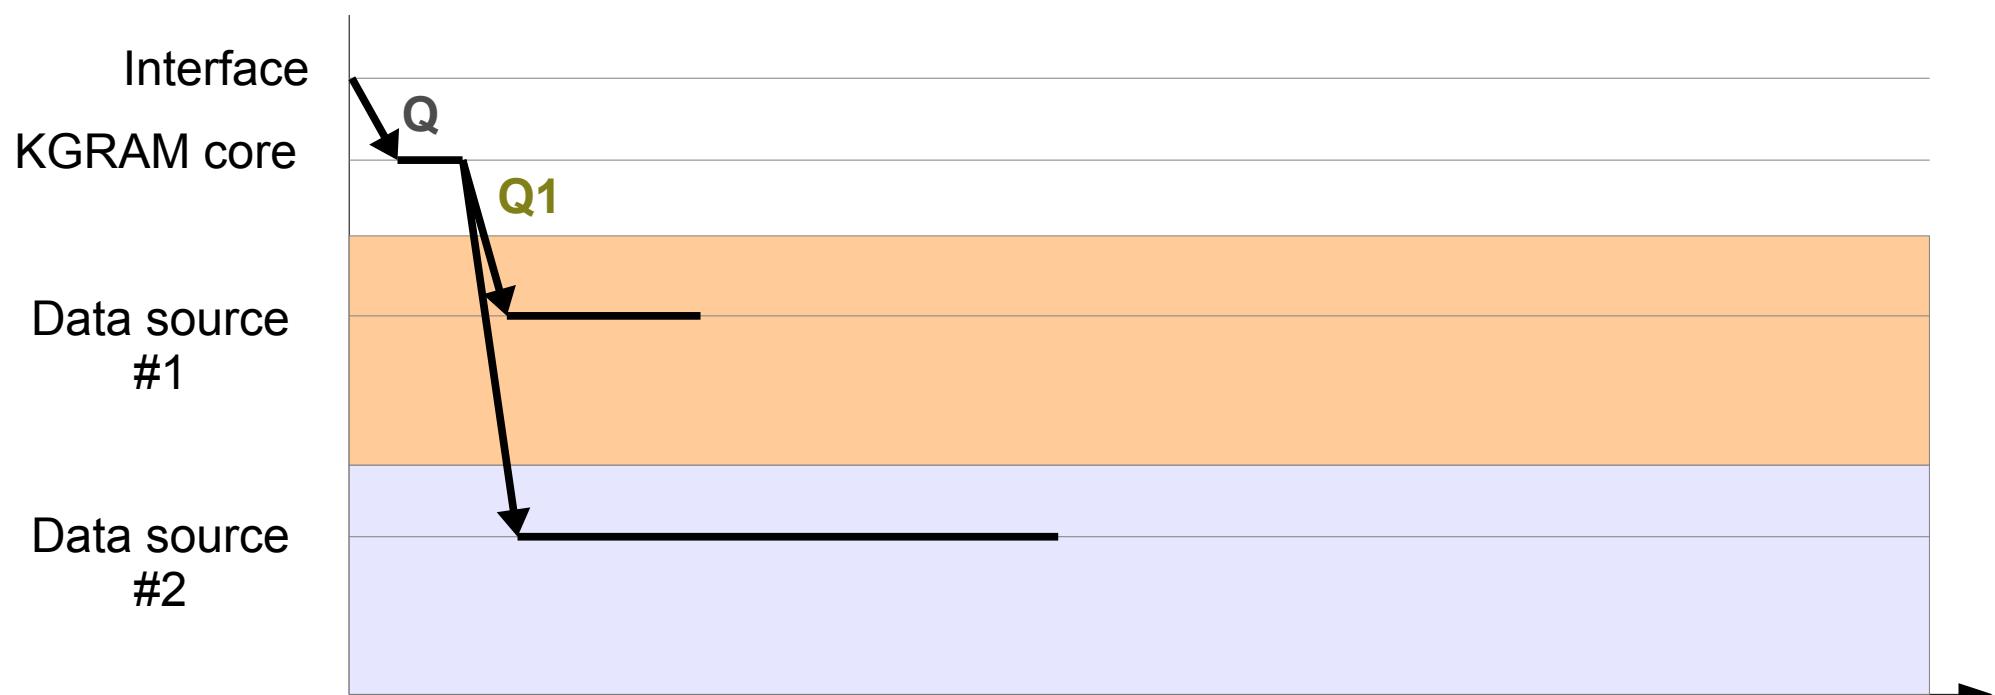

Distributed Query Processing

- KGRAM query processing

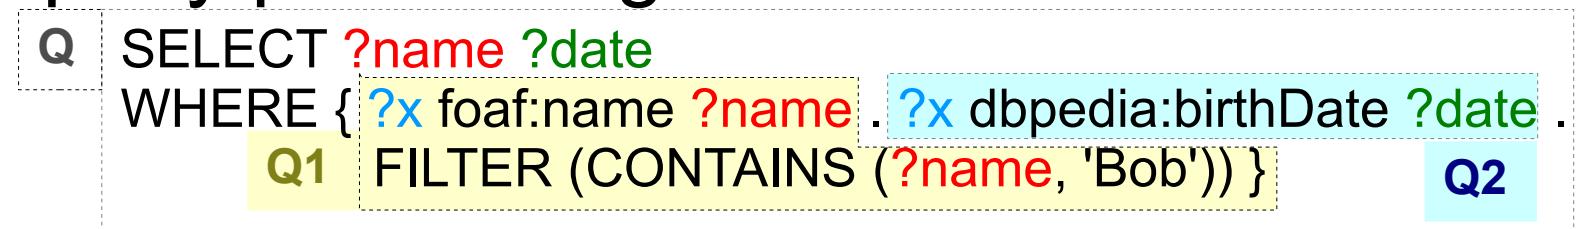

- Asynchronous execution

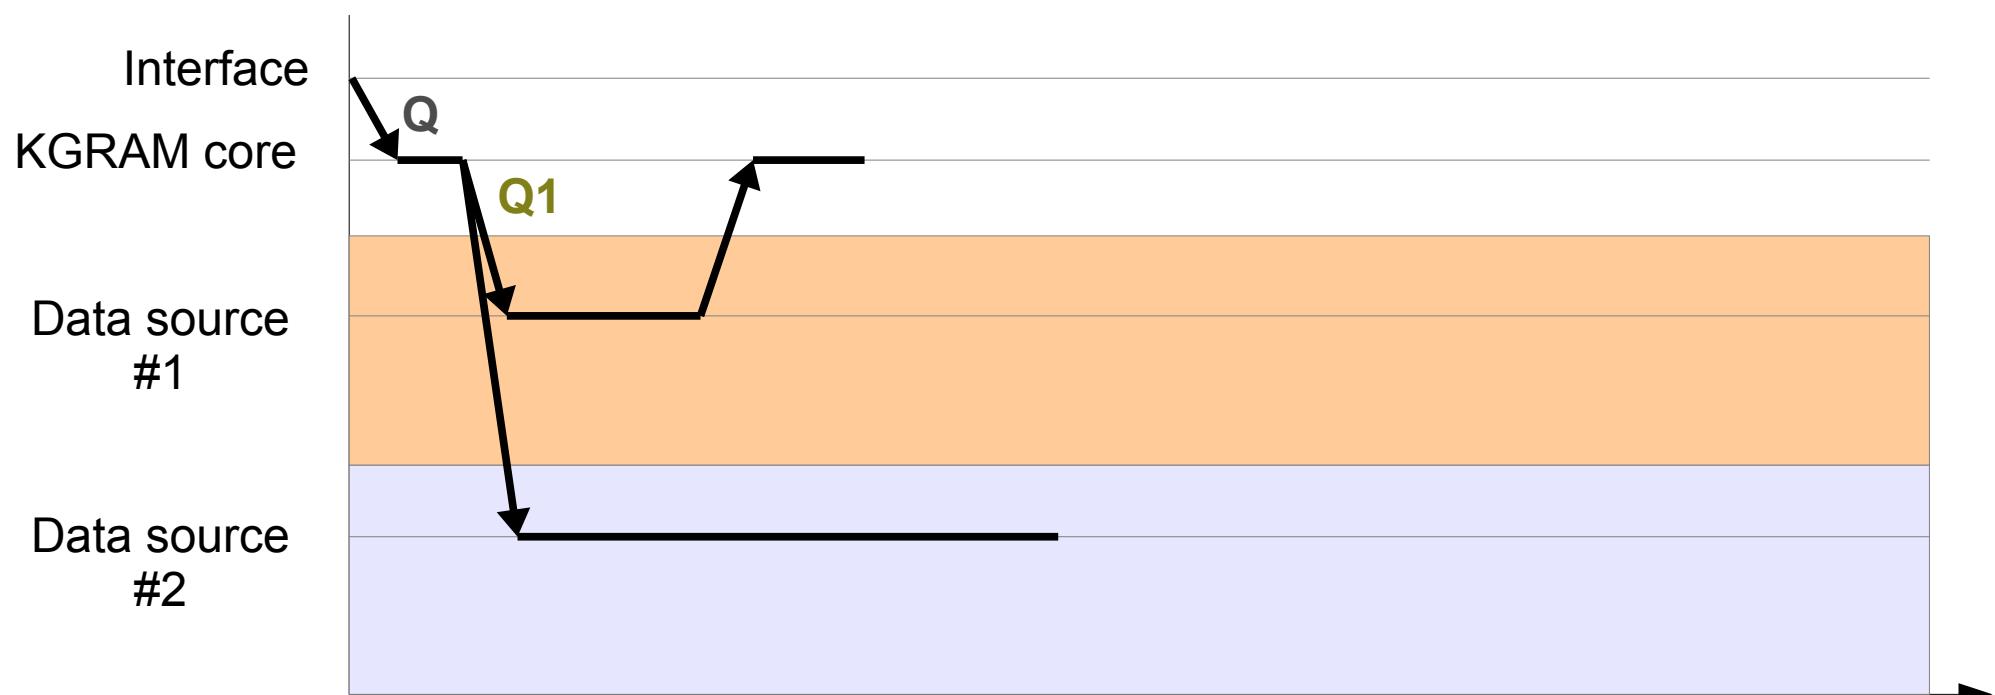

Distributed Query Processing

- KGRAM query processing

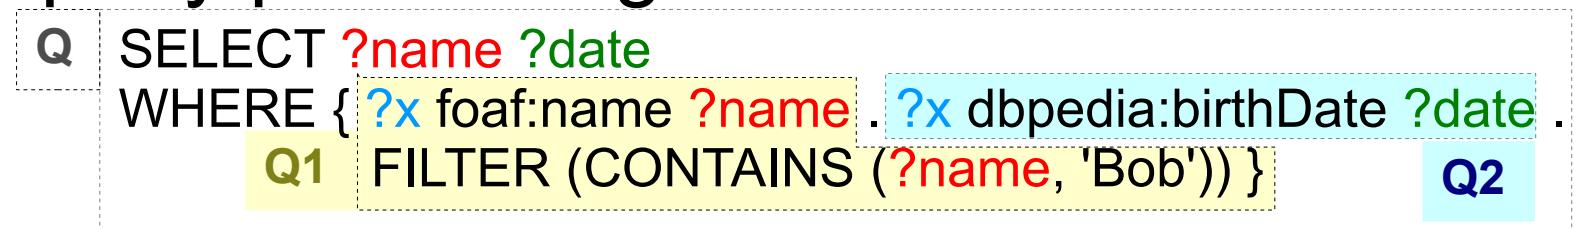

- Asynchronous execution

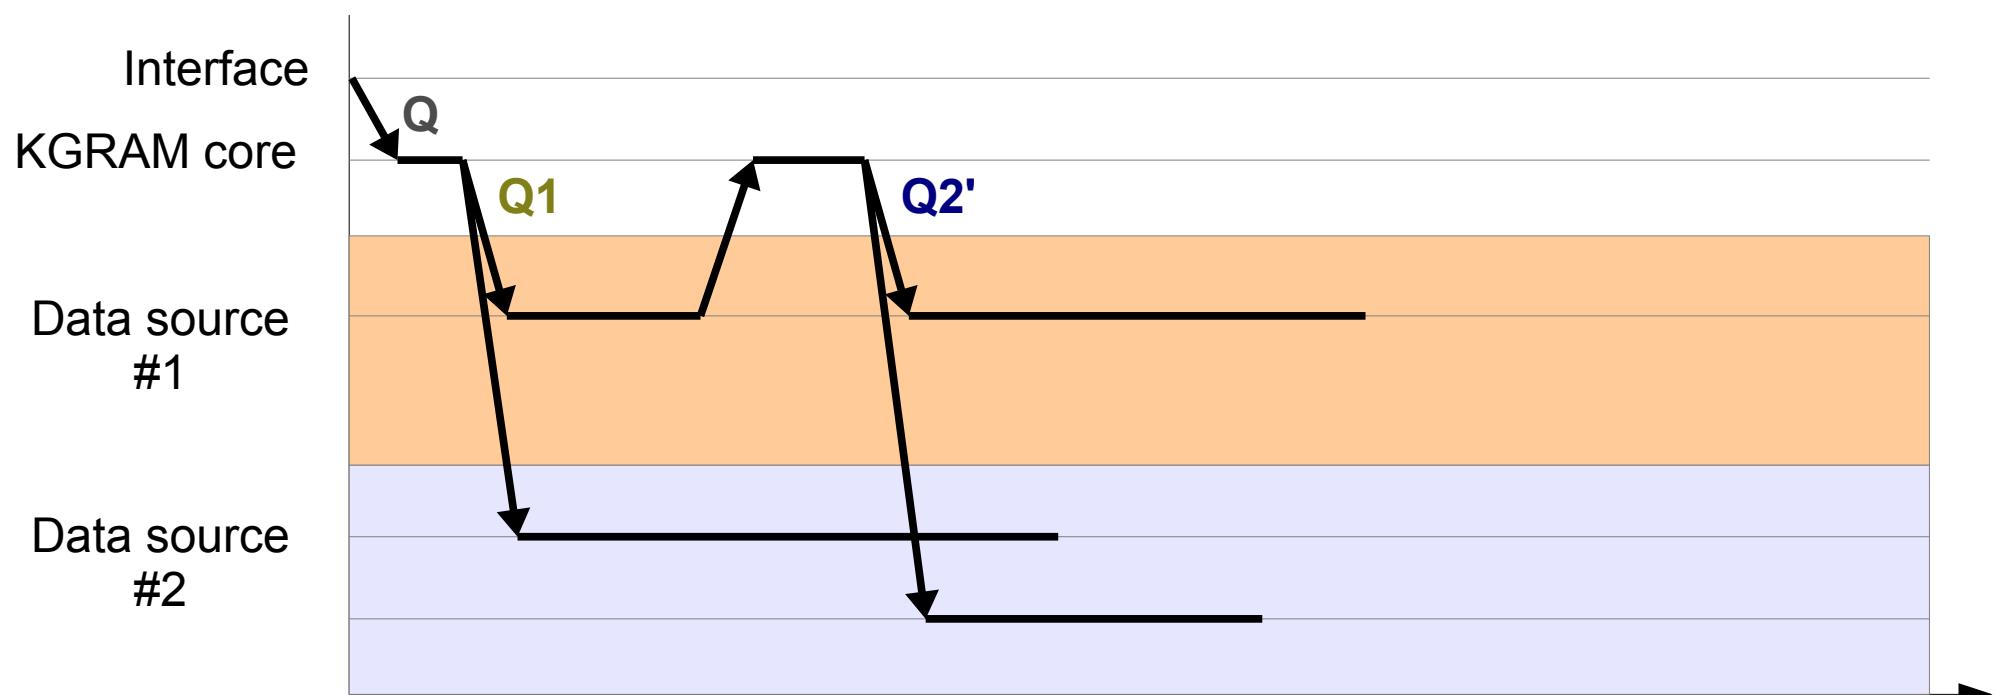

Distributed Query Processing

- KGRAM query processing

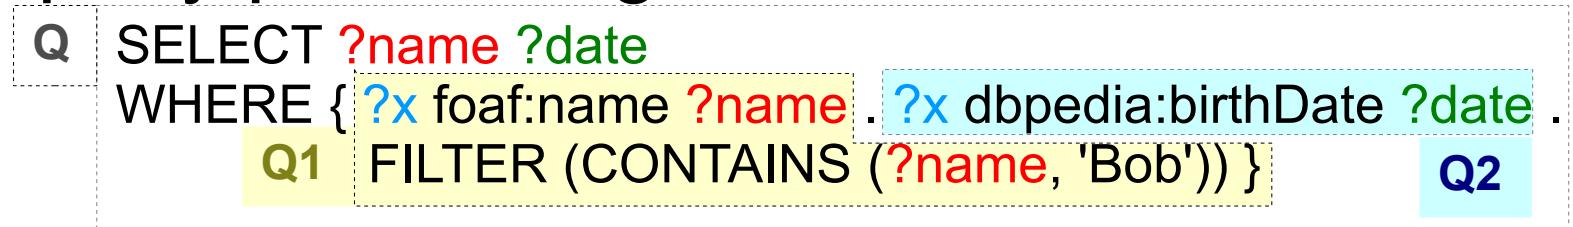

- Asynchronous execution

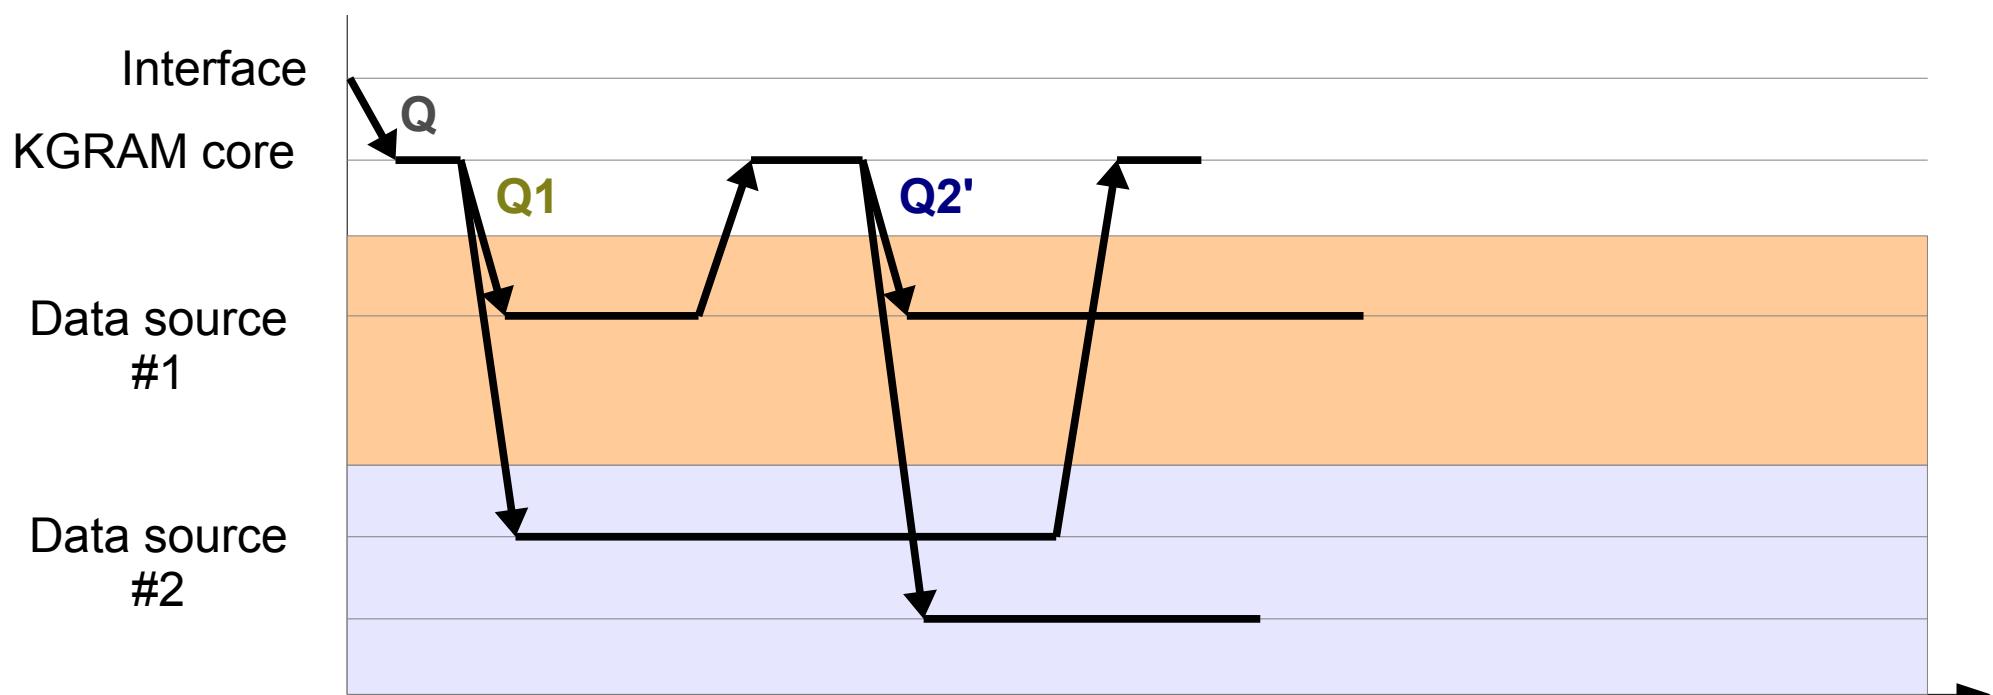

Distributed Query Processing

- KGRAM query processing

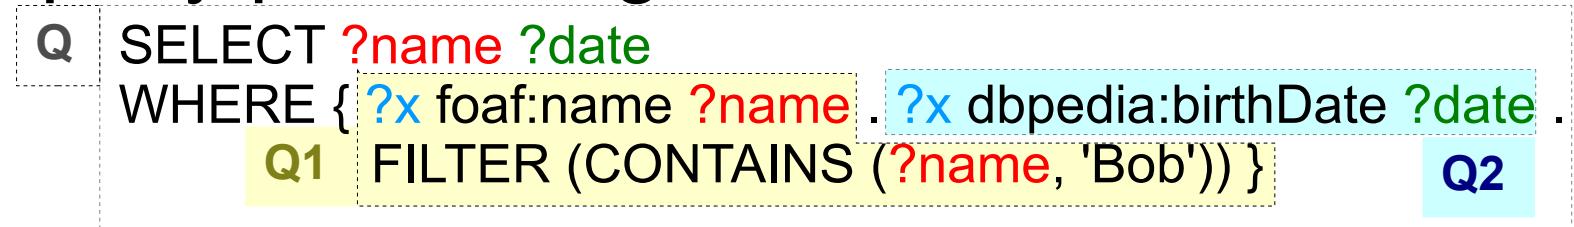

- Asynchronous execution

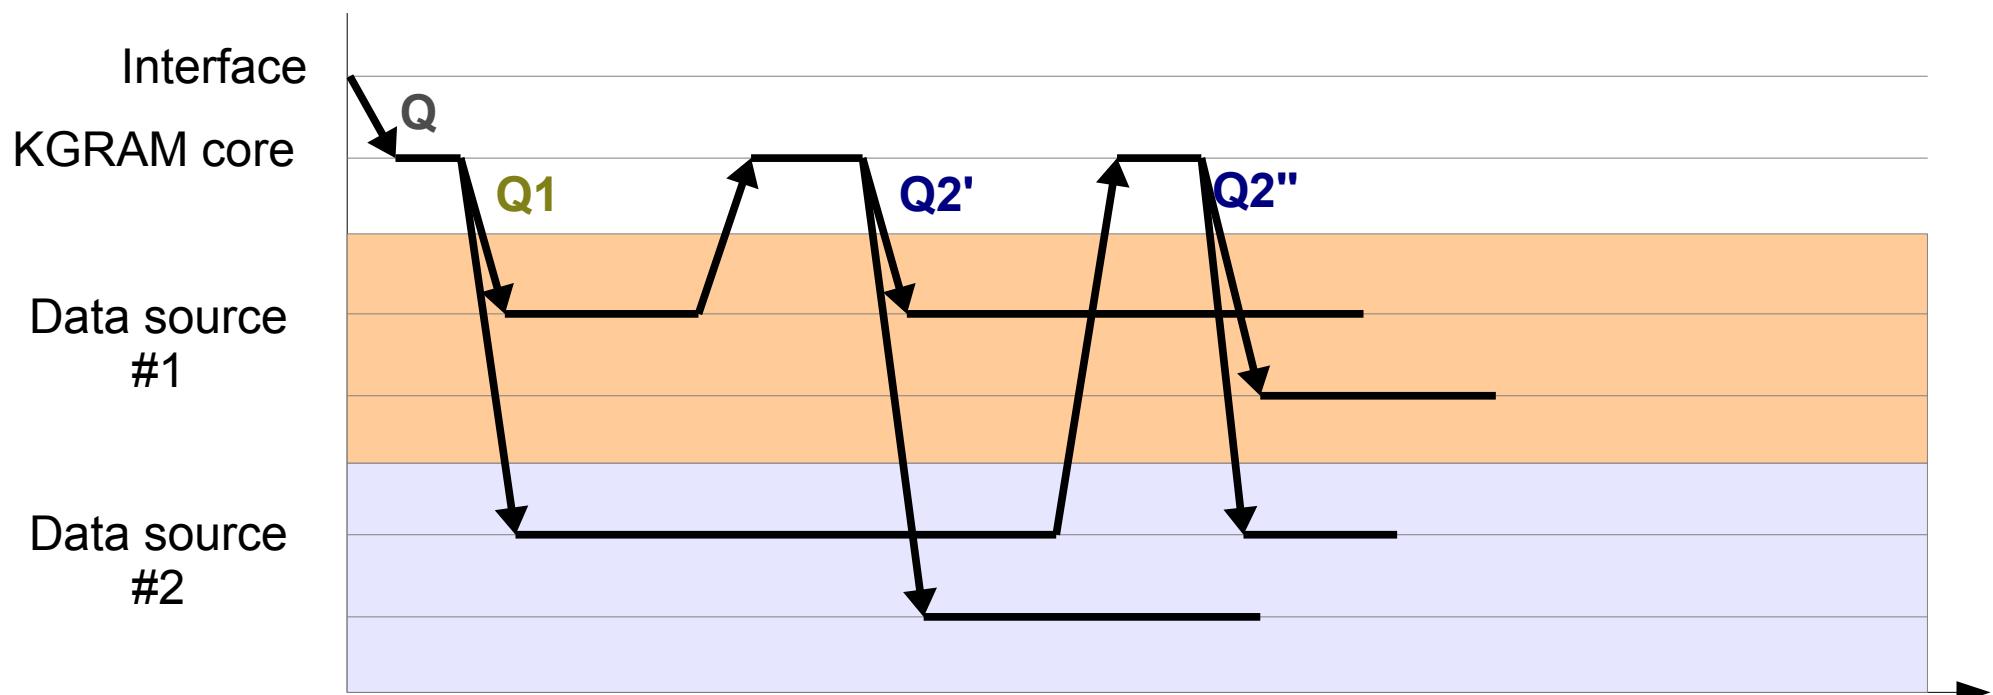

Distributed Query Processing

- KGRAM query processing

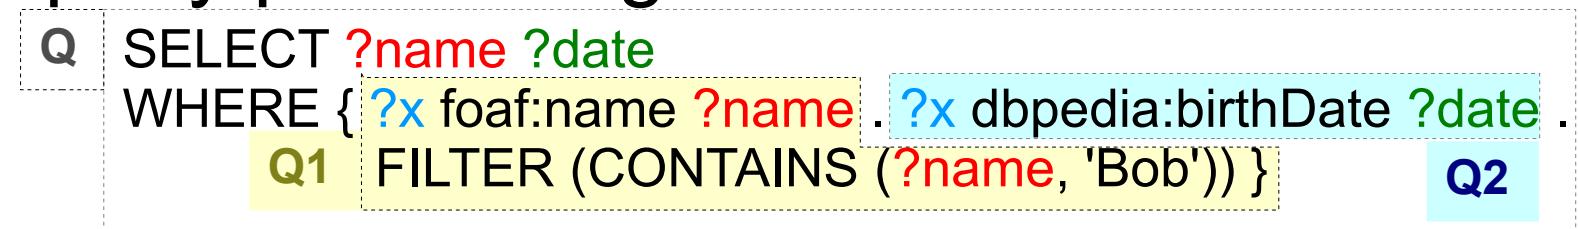

- Asynchronous execution

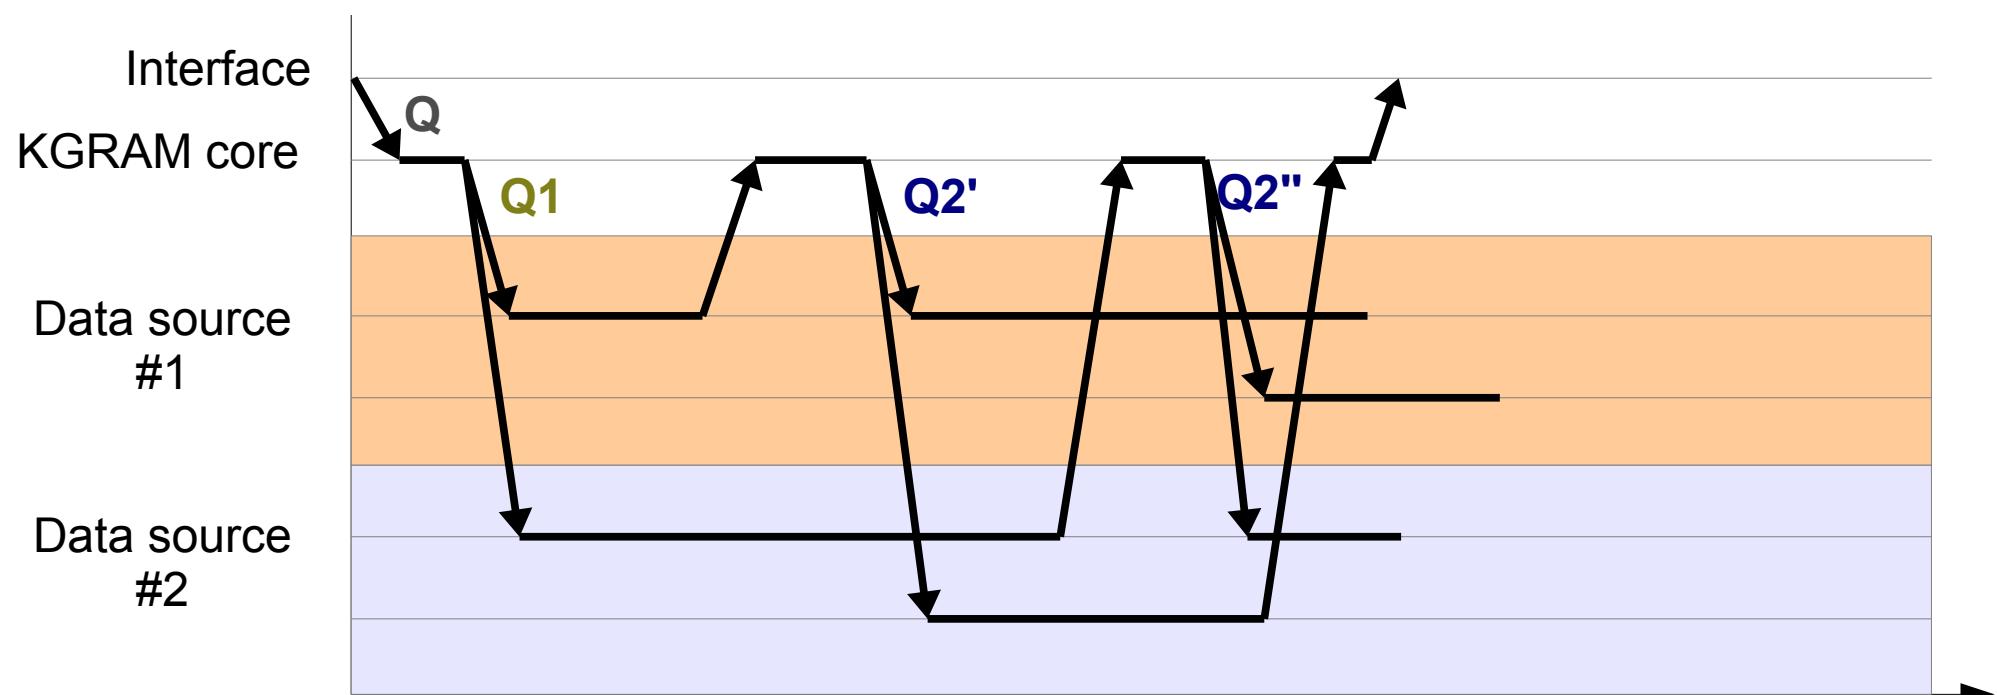

Distributed Query Processing

- KGRAM query processing

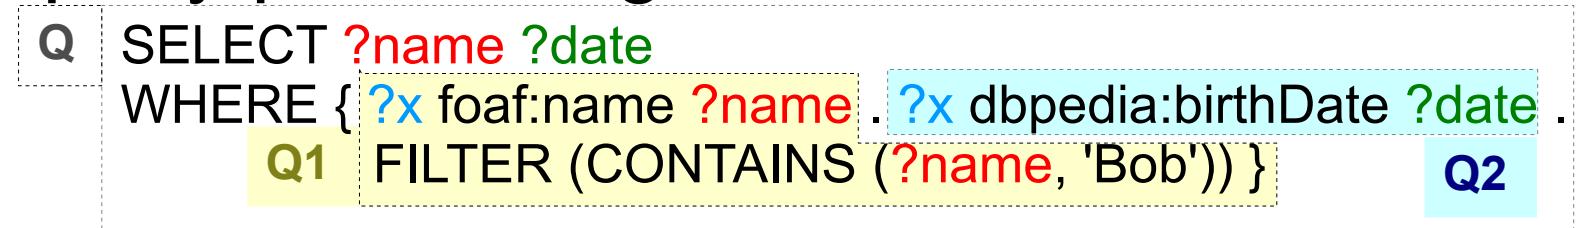

- Asynchronous execution

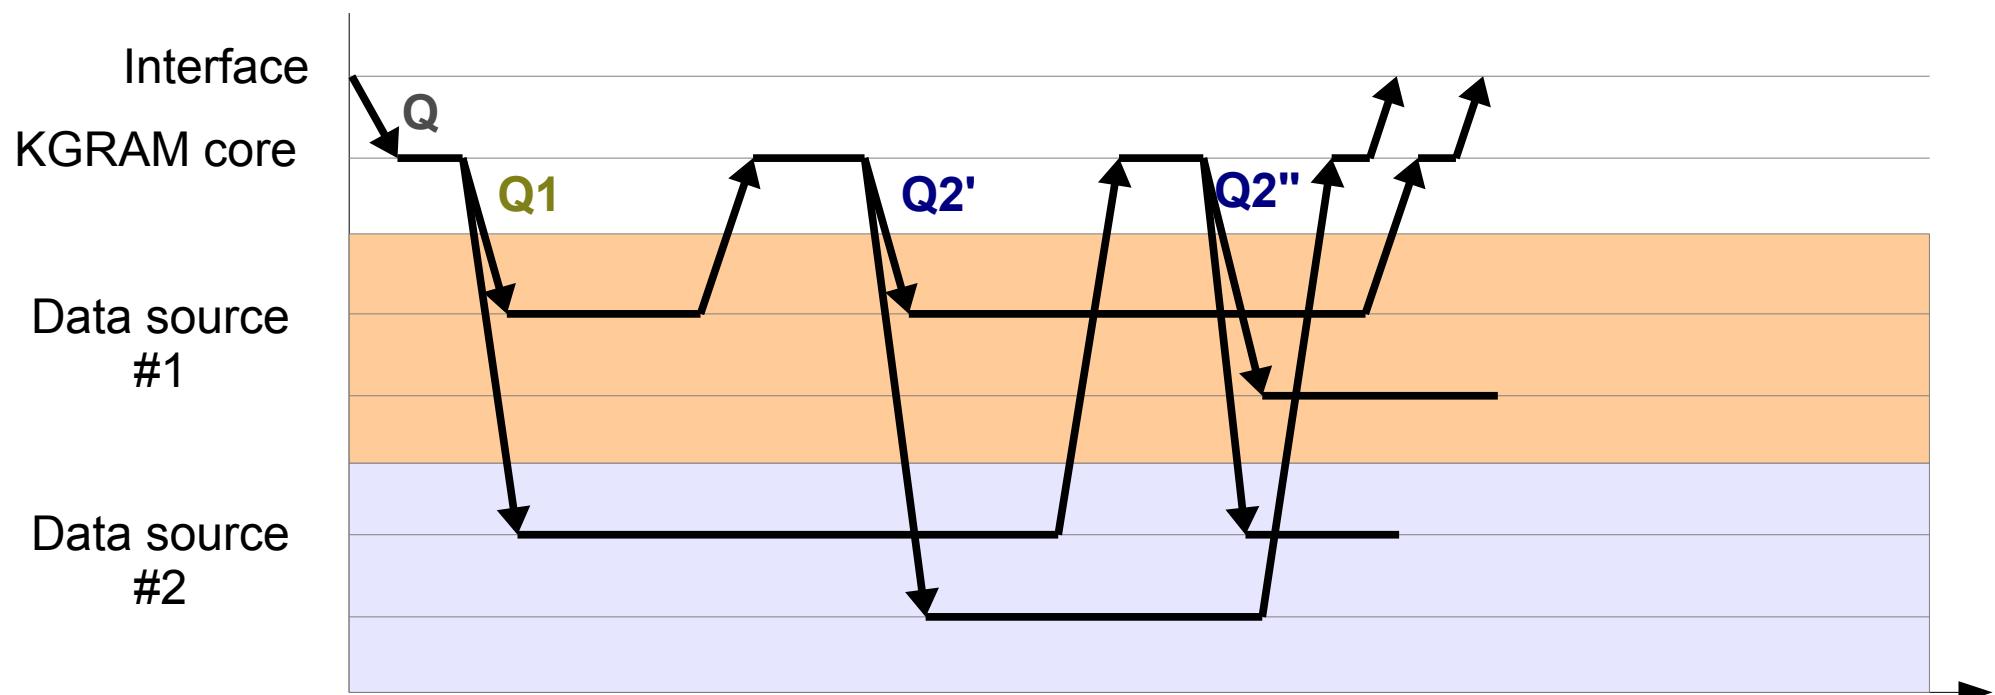

Distributed Query Processing

- KGRAM query processing

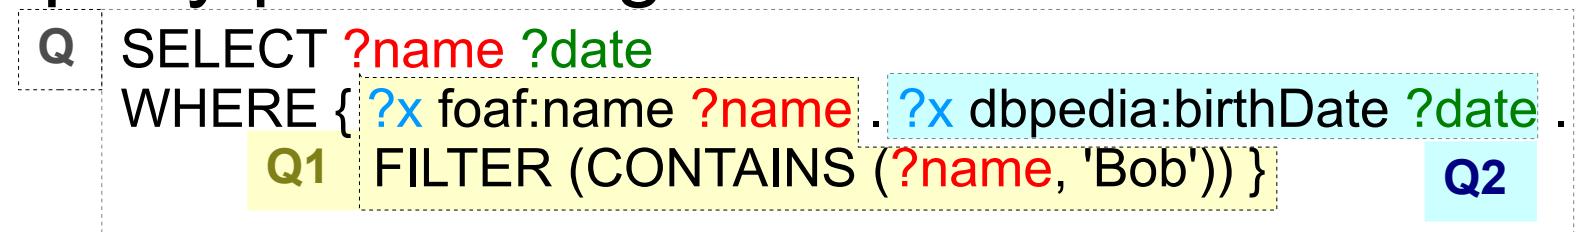

- Asynchronous execution

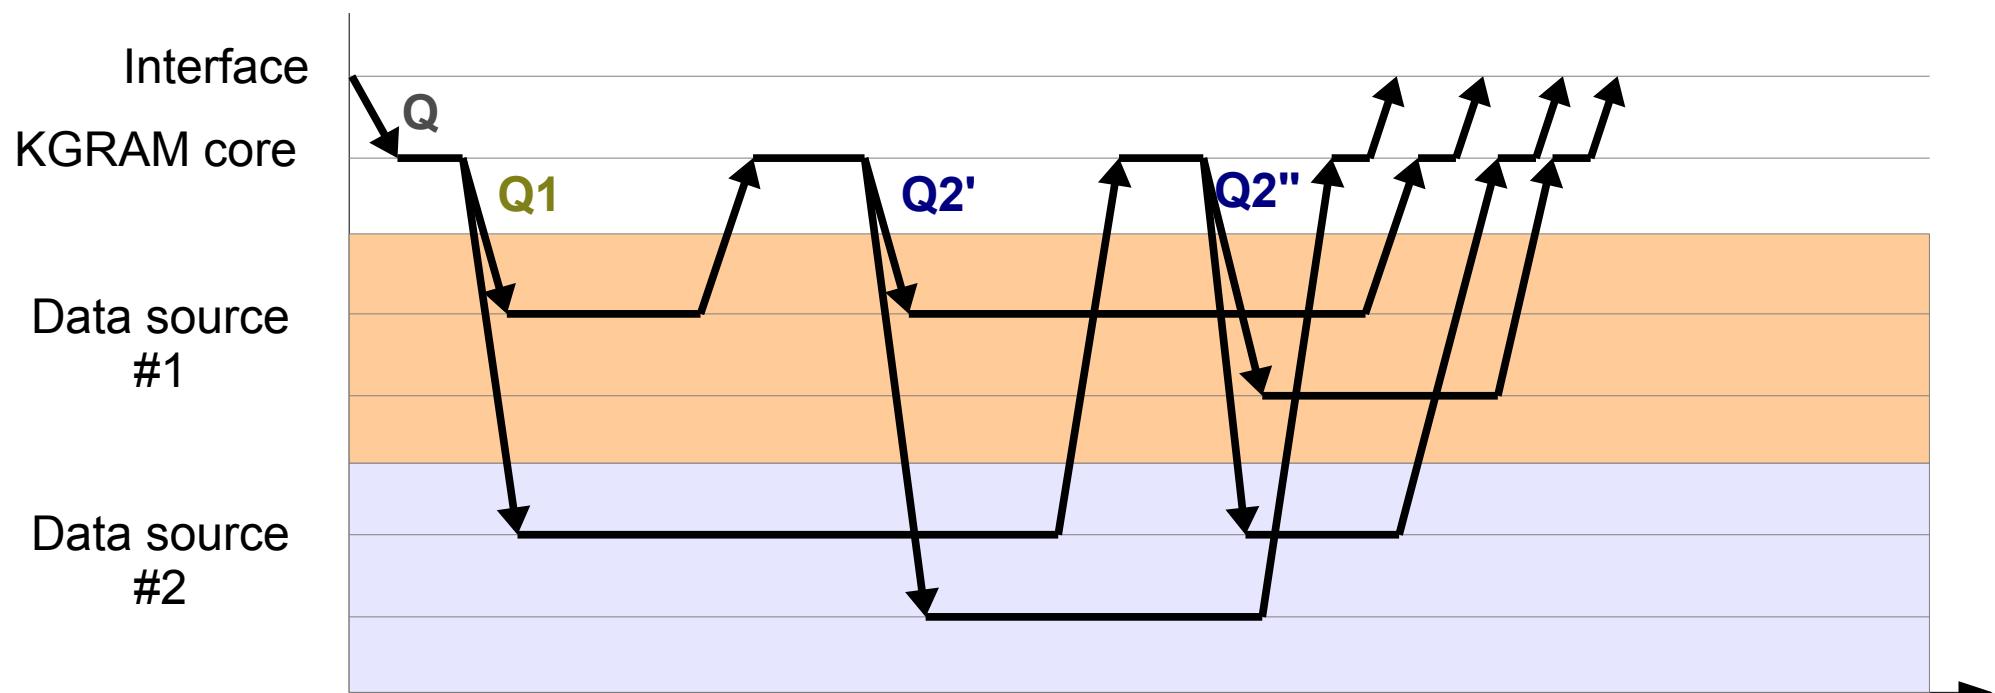

Distributed Query Processing

- KGRAM query processing

- Asynchronous execution

Workshop schedule

- Wednesday 8th (afternoon)
 - 14:30 Session on biomedical data federation in practice
(Conveners: B. Gibaud, J. Montagnat)
 - 19:30 Diner at hotel Omega
- Thursday 9th
 - 9:30 Session on Data mediation (Conveners: F. Michel, J. Montagnat)
 - 13:00 Session on Data federation (Conveners: A. Gaignard, O.corby)
 - 15:30 Session on Knowledge graphs and reasoning
(Conveners: C. Faron Zucker, O. Corby)
 - 19:30 Cocktail at hotel Omega
- Friday 10th (morning)
 - 9:00 Session on Biomedical ontologies

Workshop schedule

- Wednesday 8th (afternoon)
 - 14:30 Session on biomedical data federation in practice
(Conveners: B. Gibaud, J. Montagnat)
 - 19:30 Diner at hotel Omega
- Thursday 9th
 - 9:00 Session on Knowledge graphs and reasoning
(Conveners: C. Faron Zucker, O. Corby)
 - 13:00 Session on Data federation (Conveners: A. Gaignard, O.corby)
 - 15:30 Session on Data mediation (Conveners: F. Michel, J. Montagnat)
 - 19:30 Cocktail at hotel Omega
- Friday 10th (morning)
 - 9:00 Session on Biomedical ontologies

Let us get started

- Session 1: Biomedical data federation in practice: feedback on existing approaches (14:30 – 17:30)
 - **Camille Maumet** (University of Warwick, UK): Supporting image-based meta-analysis with NIDM: Standardised reporting of neuroimaging results
 - **Silvia Olabarriaga** (Amsterdam Medical Center, NL): Challenges for services integration into science gateways: the local story of the AMC
 - **Pascal Neveu** (INRA Montpellier, FR): From Gene To The Bottle
 - **Frédéric Segond** (Viseo, FR): Language and knowledge technologies to properly model textual medical data and support better reasoning
 - **Panel discussion.** Moderators: **Bernard Gibaud, Johan Montagnat**

Session 2: Reasoning on Graphs

- Harald Sack (U. Potsdam, DE), The Journey is the Reward - Exploratory Semantic Search based on Linked Data
- Martin Peters (U. Dortmund, DE), Rule-based reasoning using GPUs
- Guy Mélançon (U. Bordeaux), Graphs visualisation
- Christian de Sainte Marie (IBM)
- Panel discussion. Moderators: Catherine Faron Zucker, Olivier Corby

Session 3: Data Federation

- [Ruben Verborgh](#) (Ghent University): Querying data on the Web – client or server?
- [Ester Pacitti](#) (U. Montpellier 2 / INRIA, FR): Profile Diversity for Query Processing using Users Recommendations
- [Axel-Cyrille Ngonga Ngomo](#) (U. Leipzig): Hibiscus project, sources selections
- Panel discussion. Moderators: [Alban Gaignard](#), [Olivier Corby](#)

Session 4: Data Mediation

- **Pascal Molli** (U. Nantes, FR): Towards Writable and Scalable Linked Open Data
- **Freddy Priyatna** (U. Polytechnic Madrid, SP): An Overview of the Research Carried Out at Data Integration Group - OEG
- **Franck Michel** (CNRS, FR): An R2RML extension for the translation of non-relational databases into RDF
- **Panel discussion.** Moderators: **Franck Michel, Johan Montagnat**

Session 5: Biomedical ontologies

- [Simon Jupp](#) (EBI, UK): BiomedBridges project
- [Heiner Oberkampf](#) (Siemens, DE): Expressing Medical Image Measurements using Open Biological and Biomedical Ontologies
- [Alan Ruttenberg](#) (University at Buffalo, School of Dental Medicine, USA): What should the role of biomedical ontology in imaging be?
- [Bernard Gibaud](#) (INSERM, FR): ontology modelling needs for image biomarkers description
- Panel discussion. Moderators: [Gilles Kassel](#), [Bernard Gibaud](#)
